

PGP ENERGIES

GLOBAL PIPING SOLUTIONS FOR A SUSTAINABLE FUTURE

About us

At PGP Energies, we don't just supply piping — we empower global industries with sustainable, cutting-edge PVF (Pipes, Valves, Fittings) solutions. As a global leader in distribution, products, and services, we ensure that every project we touch benefits from our unmatched expertise and reliability.

Our clients trust us to deliver a seamless materials management experience, knowing they're backed by the most consistent and dependable service in the industry.

Our Mission

To help our client's procurement costs, mitigate risks, and optimize your capital projects with quality that sets the standard across industries.

Industries We Serve

Our teams of highly-trained and experienced piping professionals deliver top-notch project supply management, consulting, and turnkey services and solutions to our partners in industries such as:

Oil & Gas

Water

Hydrogen

- ✓ Chrome Alloys
- ✓ Specialty Metals

What Sets Us Apart

Mill-Direct Expertise

As specialists in sourcing mill-direct materials, we have built strong relationships with top manufacturers, ensuring the highest quality PVF products at the best prices. We are your go-to partner for piping projects requiring premium, direct-from-mill materials.

Global Distribution & Inventory

With strategically located inventory hubs worldwide, we provide quick access to critical PVF materials wherever your project is. Our extensive distribution network ensures efficient, on-time delivery, no matter the location.

From Family Foundations to Global Success

As a global leader in PVF distribution, we blend the agility of a family-owned business with the strength of an international powerhouse. Guided by strong family values, we approach every project with integrity, trust, and a commitment to long-term partnerships. Our executive team is personally involved in project oversight, ensuring our clients receive tailored service backed by the vast resources of a world-class organization.

Our Services

Project Management and Bulk Piping Supplies

We supply piping materials throughout the complete procurement process, from the first materials take off to project completion. Regardless if your business needs longer lead times or requires assistance on a more urgent timeline, our team is prepared to offer a dynamic, custom, and effective project management solution for your company's projects.

Long Term Agreements (LTA)

For customers who need support on a long-term basis, we offer fixed price agreements that span a number of years. We understand that every project has different requirements and service lengths, so we work hand-in-hand with you to develop a custom-tailored solution, including escalation clauses, buybacks, etc.

Environmental Consciousness

PGP Energies is working on going completely green in the near future, focusing on generating power through renewable means such as solar panels.

Energy Saving

Our production and distribution methods maximize operational efficiency to mitigate energy usage.

Eco-Friendliness

Whenever possible, we advise clients on how to improve the eco-friendliness of their operations.

Reduce Carbon Footprint

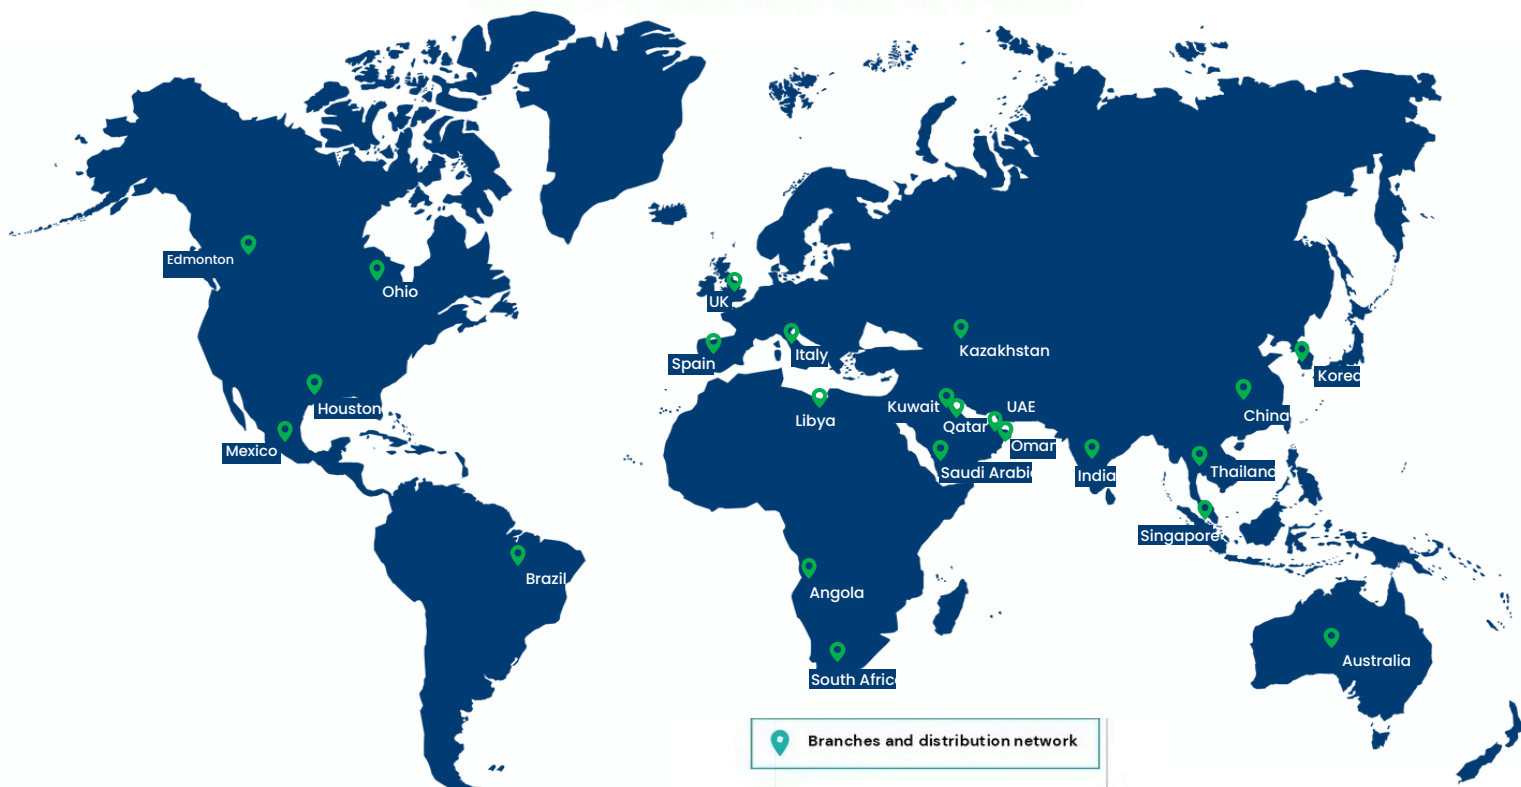

In an industry not well known for emphasizing sustainability efforts, we differentiate ourselves from our competition by making an active effort to reduce our carbon footprint.

Waste Management

Reduce-reuse-recycle is part of our culture.
